Update letter Yr 6

COMMUNITY NEWS

Flu Vaccinations

Protect yourself and your family from the flu

Getting vaccinated is the best way to prevent your family getting the flu this winter. The flu vaccine can save a child's life.

The vaccine is safe, and everyone 6 months of age and over, including pregnant women and young children, should get the vaccination.

Children are more likely to contract the flu, spread it around, and are at a higher risk of serious complications if they get sick. The flu is highly contagious and is spread easily through childcare centres and schools.

The flu vaccine is free in the ACT for:

- children aged 6 months to under 5 years
- pregnant women
- people 65 years of age and older
- all Aboriginal and Torres Strait Islander people aged 6 months and older, and
- people aged 6 months and older with some medical conditions such as severe asthma, heart or lung disease, diabetes or weakened immune systems.

Where to get your flu vaccination

Everyone can get a flu vaccine from their GP or immunisation provider.

People over 16 years of age can also get a vaccine at some pharmacies.

ACT Government Early Childhood Immunisation Clinics provide a free flu vaccination for children aged 6 months to under 5 years. To book an appointment, call Community Health Intake on 02 5124 9977.

Learn more about influenza and where to get your vaccination at health.act.gov.au/flu
